## Called in “Unassigned Service”

Please note that if you are called in Unassigned Service that the typical Hours of Service Relief rules do not apply (i.e. multiple trains, specific limits). Rather you are covered by Article 4 of the MPUL Agreement.

k. Engineers in pool or irregular freight service may be called to make short trips and turn-arounds with the understanding that one or more turn-around trips may be started out of the same terminal and paid actual miles with a minimum of 100 miles for a day, provided, (1) that the mileage of all the trips does not exceed 100 miles, (2) that the distance run from the terminal to the turning point does not exceed 25 miles, and (3) that engineers shall not be required to begin work on a succeeding trip out of the initial terminal after having been on duty eight consecutive hours, except as a new day, subject to the first-in, first-out rule or practice.

Crews to be notified when called that they are to make short trips or turn-arounds as provided in this paragraph.

If any of these limits are exceeded please submit a claim for any and all. Your timeslip should have this claim listed Available Claims. Select job->Adjust Claim->Available Claims->Short turn Svc claim. This needs to be filled out for each occurrence and is similar to the 25 miles zone claims.
